INCA METAL PRODUCTS CORPORATION • CARROLLTON, TEXAS

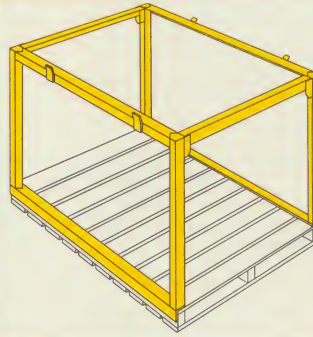

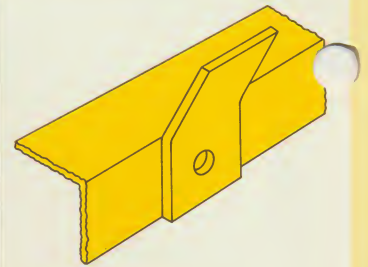

Attach Stack-A-Pallet frame to pallet.

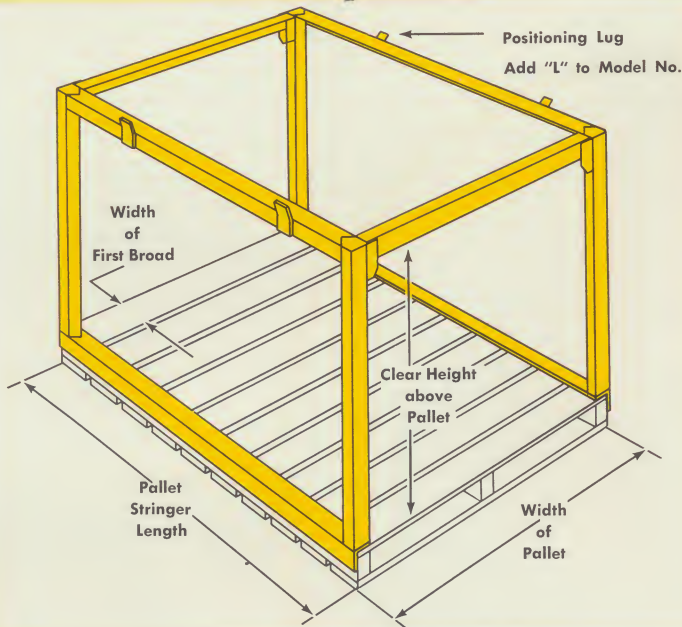

Use pressure to hook securely to pallet stringer as illustrated.

After attaching both stringer length sections insert bracing channels as shown above.

Insert wedge into slots into end sections and lock securely as per drawing.

# STACK-A-PALLET

## SURVEY and PROPOSAL

Stack-A-Pallet handles safely and economically without sway or twist. Stack ceiling high with any type equipment. Perfect alignment is not necessary. Store knocked down. Capacities to 12,000#, stacked.

1. To determine over-all height, add pallet height, and desired clear load height plus 3".
2. Posts can be supplied with slots the entire height if intermediate shelves are desired. This must be specified.
3. Consult factory for special pallet applications.
